**SCX®** presents the **C3 F-1 Circuit**, **SCX®**'s number one track, including as it does a car belonging to the team which currently holds the world championship and the car driven by the twice champion Fernando Alonso, as well as the eagerly-awaited PIT BOX for Original format. This is a fast, technical circuit which includes straights and bends together with a bridge – a circuit which is ideal to test your skills to the full.

With the **SCX®** PIT BOX fuel takes on as much importance in our races as in the real competition, to make you feel just like real Formula 1 drivers.

The **C3 F-1 Circuit** features the **Ferrari F2008** plus the **ING Renault F1** raced by the Spanish driver Fernando Alonso, for you to enjoy a race where the drivers and their teams are the real stars – a race you can now recreate on your **SCX®** track.

The pack includes the eagerly-awaited PIT BOX for **SCX® Original** at no extra cost. With this you can simulate real races by counting fuel consumption and making the competitors refuel.

The functions of the PIT BOX allow different options for the size of the fuel tank and choosing the amount of fuel with which to start the race. Fuel consumption is proportional to the position of the trigger on the controller; an illuminated indicator shows you the fuel level and how much you have left in your tank at all times. If you run out of fuel you cannot carry on as you are out of the race. You can refuel your car by stopping in the Pit Stop area, where you fill up by pressing the appropriate trigger. Once you have finished refuelling, just press the button to take the car back into the race.

Make your own championship even more realistic with the new **C3 F-1 Circuit** from **SCX®**.

## PRODUCT DETAILS

**Distance:** 6.49m

**Size:** 293mm x 138mm

**Contents:**

10 standard curves
